Welcome

Kvisoft Flipbook Maker Pro is an easy to use yet powerful flip book making software. It just take a few clicks to make a flash flipbook, and then share online, distribute on mobile, deliver offline, and so on.

Kvisoft Flipbook Maker Pro, a helpful Flash & **HTML5 page turning software**, offers you a professional yet easy way to design 3D animated flipping page publications from PDF, **Word, Excel, PowerPoint** files, images and flash movies. A nice program for anyone to generate digital publishing creations like digital magazine, image gallery, flip catalog, e brochure, page turning eBooks, e-newspaper etc. And it is a handy tool for converting those copies to videos.

Distribution in any modified form is expressly forbidden without written permission from Kvisoft Corporation, which shall not be unreasonable withheld. Any exploitation of Kvisoft Flipbook Maker Pro for profit is forbidden without written permission from Kvisoft Corporation.

Key features

Flash & HTML5 digital publications

Digital publications can be created in HTML5 as well as flash. **HTML5 format** is the most popular format for mobile devices such as **iPad, iPhone, iPod, and Android-powered devices**. Mobile users can also get the digital experience from HTML5 publications with these features: watch videos, browse images, click links, listen music, etc.

Digital Magazine in multi-languages

Create flash flipping digital magazine in multi-languages to adapt for international readers around the world. After import all files with different languages, this digital magazine software will create one page flipping e-book that allows readers to select languages. It will save your time by avoiding duplicated edition for various versions.

Support multiple types of files, PDF, PowerPoint, Word, Excel

Besides importing PDF files, you also can import **Office files (Word, Excel, PowerPoint)**, Flash movies (.flv, f4v, mp4 and .swf), and images (.jpg, .png, .bmp, .jpeg, gif) into page flipping pages. So, it would be a nice digital publishing tool to make digital flipping publications and video flash magazine.

Bookcase for showing multiple online eBooks

To show more online digital publications, you can use Bookcase tool of this Kvisoft HTML5 eBook software. By adding URLs and thumbnails of online publications, you can easily put multiple e-books on the built-in bookshelf next to the publication. So, more related e-books will get more exposure. It is a good chance for publishers to increase e-books sales or share more publications online.

Powerful editing function: add pages, text, callouts, shapes

With Flipbook Maker Pro, you can easily edit your flip magazine. For example, add text in different types: plain text, dynamic text, and callouts. And you can also insert various shapes on the flip pages including Lines, Arrows, Labels, Action Buttons, Ellipse, Rectangle and Formula shape, etc.

Integrate multimedia objects: videos, images, gallery, and links

Adding multimedia files to flip pages to enrich your digital magazine, including:

- ✓ Videos: online video (**YouTube & Vimeo video included**) and offline video that saved on your local computer.
- ✓ Images: offline photos, **online images on Flickr or other sites**, and screenshot captured by this program.
- ✓ Gallery: Support slideshow and stack gallery.
- ✓ Other interactive Medias: flash movies, vivid SWF files, hotspot, links and music sound.

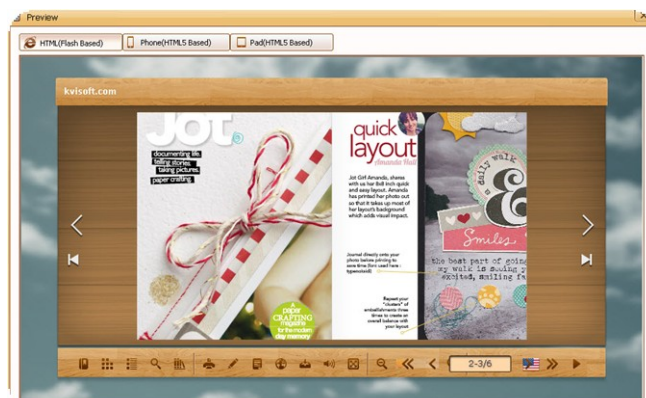

Flexible publishing output formats options

- SEO friendly **HTML** format for websites viewed on PC and MAC.
- **HTML5** format for viewing on mobile devices (**iPhone, iPad, iPod Touch, and even Android-powered devices**) So mobile users can also get the digital reading experience with all features like web version: watch videos, browse images, click links, listen music, etc.
- **APP**, standalone executable file for MAC.
- Standalone single wrapped **SWF** file.
- Stand-alone **EXE** for CD delivery.
- **ZIP** package for email or transferring.
- **Screen Saver** (*.scr format flip album) for your computer.
- **Video** in different formats.
- **Batch Publish** Multiple files into one flip publication

Excellent real-time preview function

It provides three kinds of preview, flash based preview for web, HTML5 based preview for phone, HTML5 based preview for pad. You can confirm whether the flash magazines or HTML5 eBooks meet all effects you want before converting. This is for saving time to create stunning flip magazine.

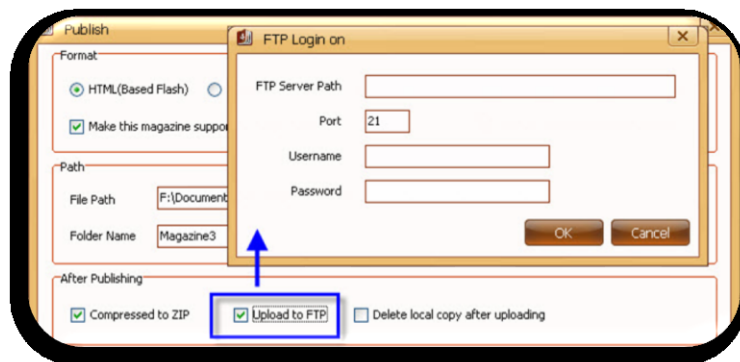

Google Analytics Integration

Extend the power of Google Analytics in your digital publications. By inputting your Google Analytics account ID in the publishing flip book, you can monitor and analyze the traffic of your online flipping book with ease in your Google Analytics account live. Nice way to increase your marketing effectiveness using Google Analytics within the publications.

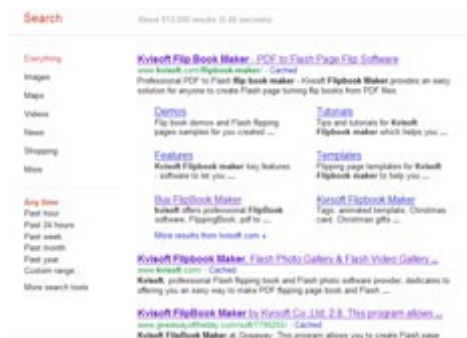

Built-in FTP Uploader

Flipbook Maker Pro includes a built-in FTP Uploader. Once you have created the digital publication, you can upload the file to your FTP server directly by checking the “Upload the FTP” box and setting FTP Server Path, Port, and login account.

SEO Friendly

All texts would be indexed by search engines after converting PDF to Flash magazines. The page flipping books are SEO friendly. You also can do in-page SEO optimization work (define page title and Meta data) for web and everyone can find your digital magazines via the internet.

Social networks sharing

The Flash flipping books created from PDF via Flipbook Maker pro provide means of integration with popular social network sites. Viewers can share the flash flipping book to Facebook, Twitter, LinkedIn, Digg and more sites. It also works for sending email or copy URL to others.

Useful reader-friendly functions

Allow your readers take actions on digital publications and keep the traces for them.

- Readers' bookmark. Bookmark function lets readers mark important pages, and quickly access to these pages next time.
- Brush function. Readers can make many different kinds of marks or highlight on the page content by this brush feature.
- Text select/copy highlight. This text select function allows readers select and copy any text on the page.
- Search and Zoom. Viewers can use the search function to find relevant messages from the e-publications. And they can zoom in/out the e-books to make reading more easily.

This program is powerful and professional with rich functions, for other features, check this page

 - b. Click added elements on page, blue frame will appear which means it is in editing condition, with editing tool.
 - c. Open Outline tab, click specific elements title, you could choose page or switch editing for elements.

Normally, on the edit tool panel, there are toolbars for setting of Properties, Layer, Action and Effect and others tool various by which element you are editing. See more details in next chapter.

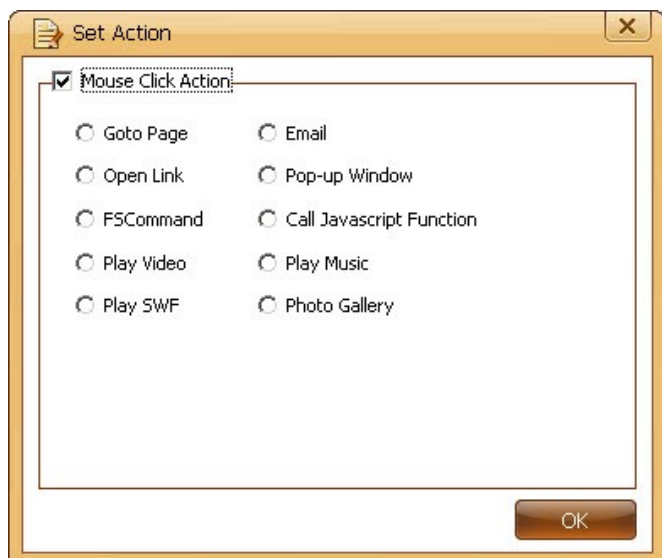

Properties panel is for setting element name / position / size. Position and size also can be changed by adjusting the blue frame on page in workspace area.

Layer panel is for changing order of different element layers.

Action panel allows you to set interactive actions with readers. For example, you could set action after reader click mouse on the element.

Part2: How to create/design/edit flash flipbook

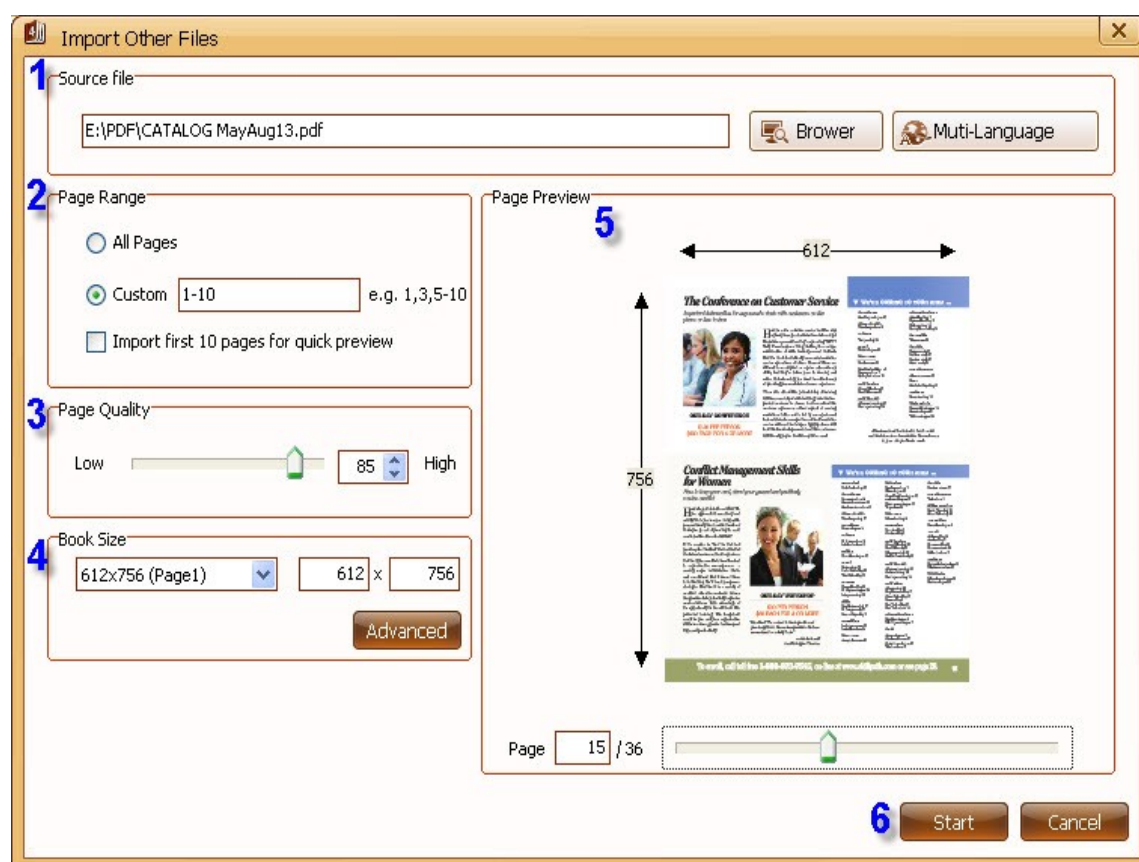

1. Import Files

After click the New Project menu on home page, you could select a file and import it to the program.

Support files include PDF, Office files (Word, Excel, PowerPoint), Flash movies (.flv, f4v, mp4 and .swf), and images (.jpg, .png, .bmp, .jpeg, gif).

Import Settings.

After selected the file you want to import, here is Import Files window:

1) Source File path:

Click the Browse icon to reset path of the file you want to import.

2) Page Rages.

a. All Pages: import all pages.

b. Custom: import some of pages. For example, '1, 3, 6', meaning only importing page 1, 3 and 6, while '7-10' meaning importing from page 7 to 10.

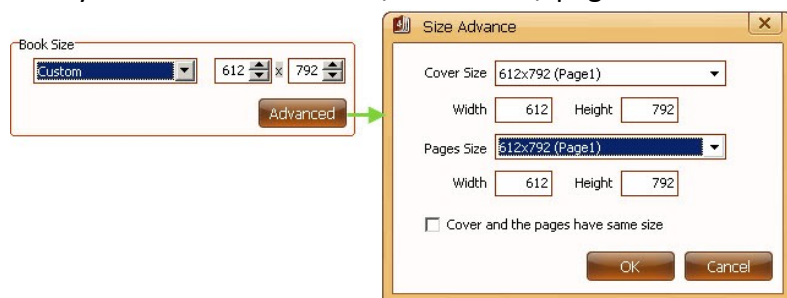

Check 'Import first 10 pages for quick preview as you like.

3) Page Quality.

High quality output large file, low quality output small file. Just choose what you need.

4) Book Size.

Here you could set book size / cover size / pages size.

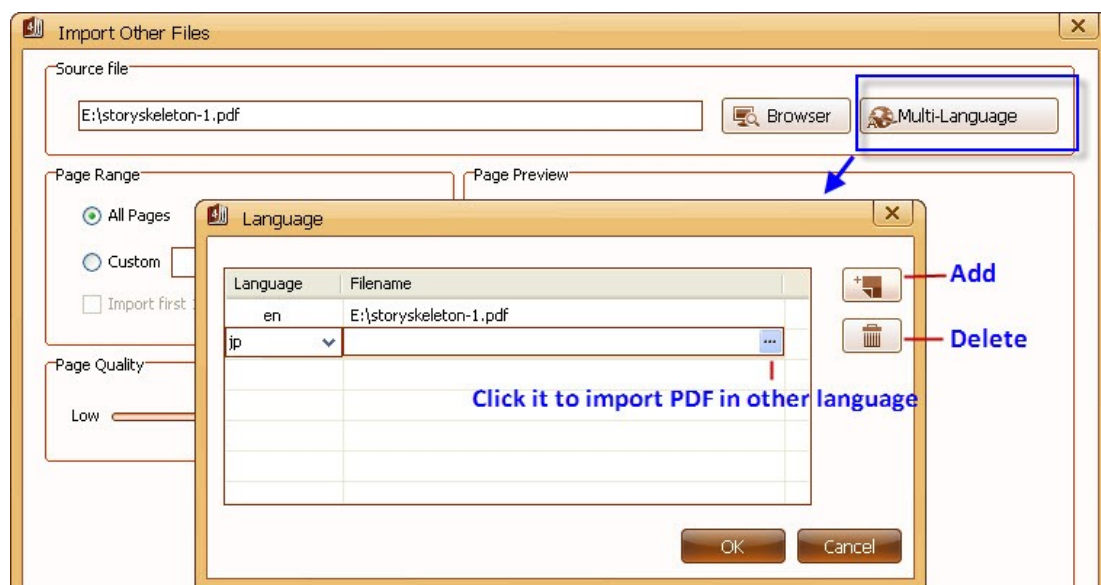

5) **Page Preview.** After input number or adjust the bar under thumbnail, you could preview all pages.

6) Click 'Start' button to save your settings and import files to Kvisoft Flipbook Maker Pro.

Multi-language Version

If your document has several versions with same content but in different languages, you could click the

Multi-language button  Multi-Language to import PDF in other languages.

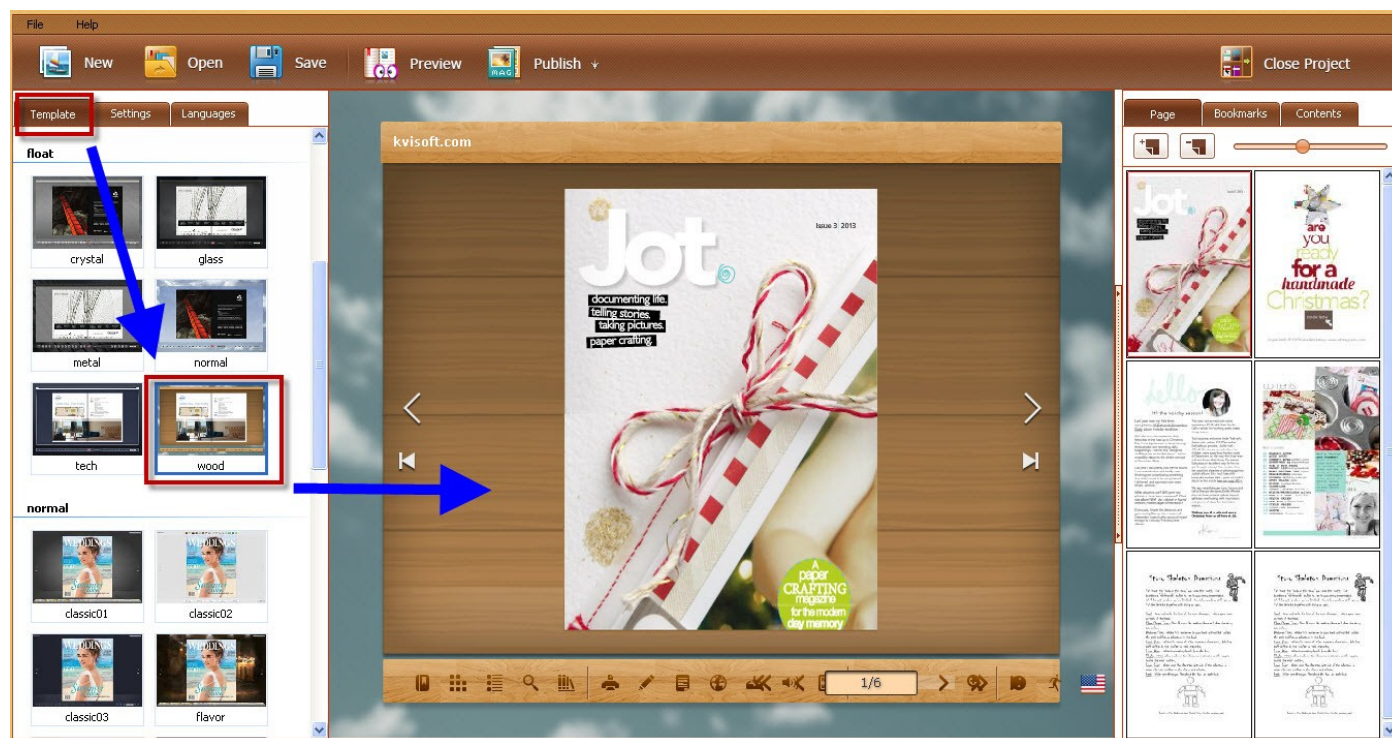

Then the software will automatic generate one flipbook in Multilanguage. Readers can switch languages freely during reading time.

2. Design Flipping Book

Select Template

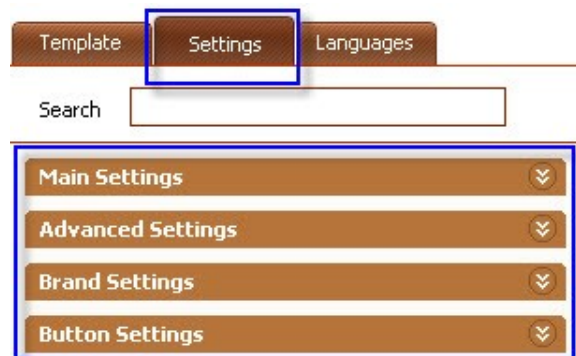

FlipBook Maker Pro offers you an easy way to make a Flash Flipping Book by using variety of flip book pre-set templates. Just click thumbnail on the left side, then you could view result on the right side.

To save project, you could open it next time as **customized template**, and continue editing.

Advanced Settings

In Settings panel, there are plenty of options for you to custom and personalize your publication. It is divided into 4 categories, Main Settings, Book Settings, Brand Settings and Button Settings. Inputting words on the search box, it will help you to locate specific option quickly.

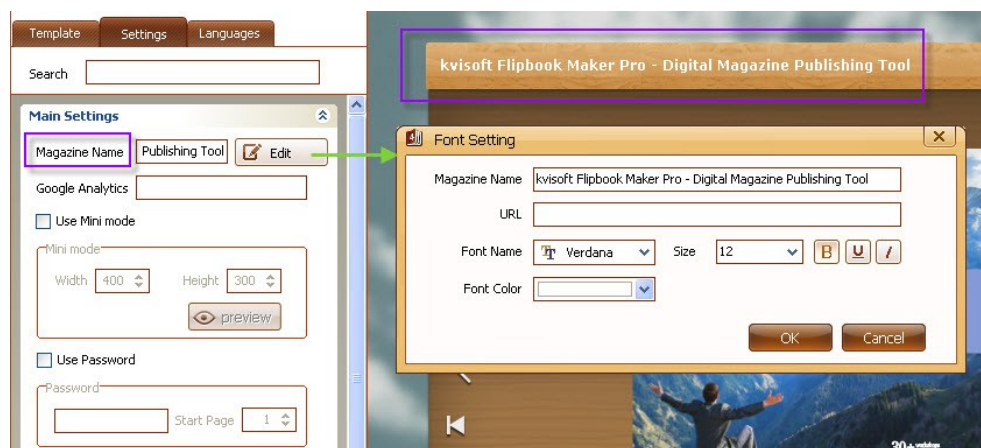

Main Settings

Magazine Name

You can type to input the Magazine Name which will show on top of flipping book. By clicking the Edit button, you can change title name, input URL which will be opened once readers click the magazine name, or set

font/size/style/color etc.

Google Analytics

By inputting your Google Analytics account ID in the publishing flip book, you can monitor and analyze the traffic of your online flipping book with ease in your Google Analytics account live. Nice way to increase your marketing effectiveness using Google Analytics within the publications.

Mini Mode

All buttons and tool bar/box are hidden, like:

How to set mini mode?

Please first check the box of Use Mini mode, then set Width and Height. When adjust the window of flipbook while viewers are reading, if size of flipbook is smaller than the defined size, it will show as mini mode. Hit the Preview button to see its effect.

Password

This feature allows you to protect privacy of your flipping book. You can set password from here, so who read this book should enter password beforehand. First tick the box of Use Password, next input password. By setting the number of Start Page, you could keep whole book or some pages confidential.

Background

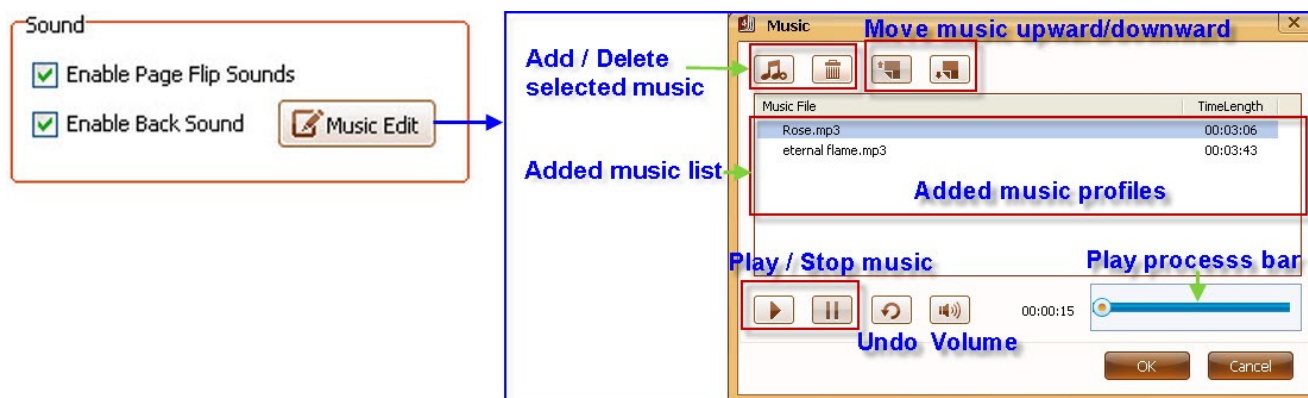

There are 2 types for background:

1. Set background with single color, or mix another color by ticking box before 2nd color check. By 3rd check, you also can choose the way how color radial change, there're 3 selections: Radial, Linear-h and Linear-v.
2. Embed static or dynamic colorful background which adds fun and goo look to your flipbook. To change transparency of background, please adjust the bar.

Tips: Add own background. You can add you own pictures as your background, just paste them into correct folders under background folder (where you install our program).

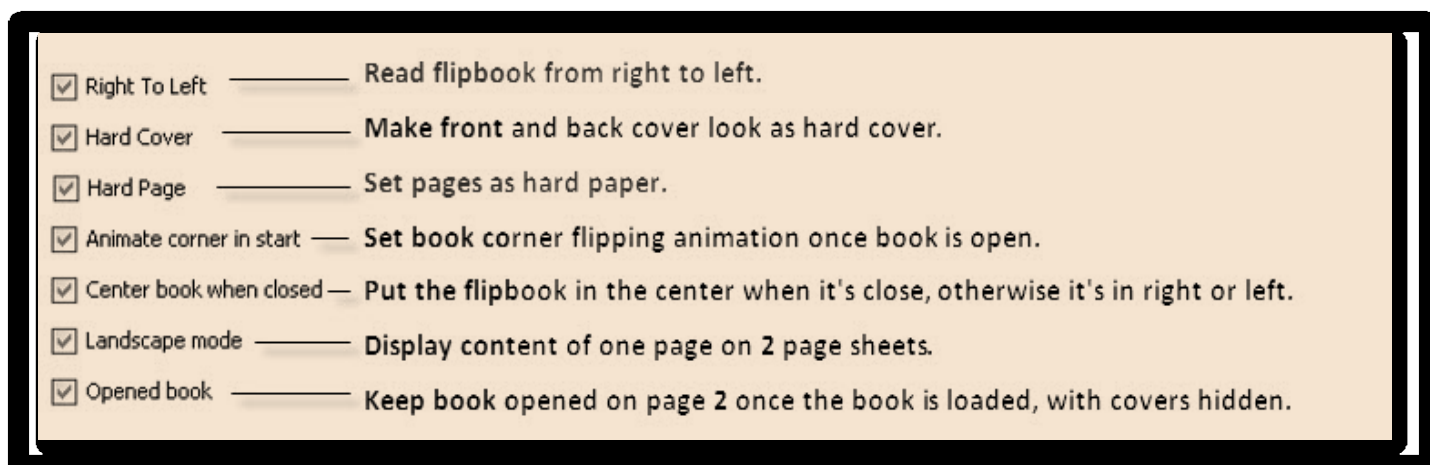

Sound of background

You can enable / disable page flip sound (the sound of flipping pages) or background sound (sound which playing during reading the whole book). Press Music Edit button, you could add your favorite music songs and do some simple modifications.

2. Advanced Settings.

There a lot of options for setting your book, right to left, hard cover/page, animate corner in start(a flipping animation for book corner once open the book), center book when closed, landscape mode, opened book.

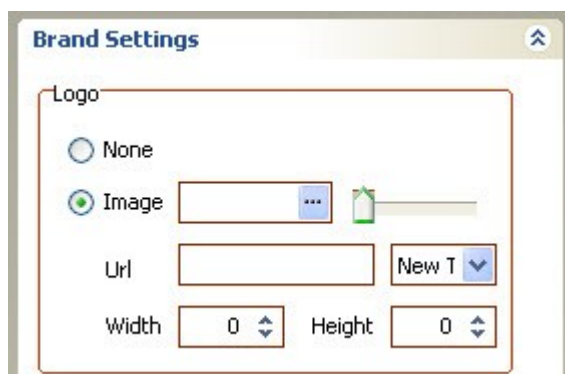

Besides, you could set other settings about drag area, flip speed, page thickness, spine, reflection, auto play, etc.

3. Brand Settings.

For commercial publications, it is good to brand your creations. Here, you could add logo and set preloader.

Add Logo

You can add your company logo which will stay beside book pages. To add logo, here are simple steps:

- a. Tick on Logo option.
- b. Click button to load your brand logo from local driver.
- c. Enter the link which will direct to the page when you click the logo. If you do not want it, just leave it blank.
- d. Set width and height of logo.
- e. Set position of logo: Left Top, Right Top, Left Bottom or Right Bottom, choose one.

If you do not want to show logo, just tick the option of None.

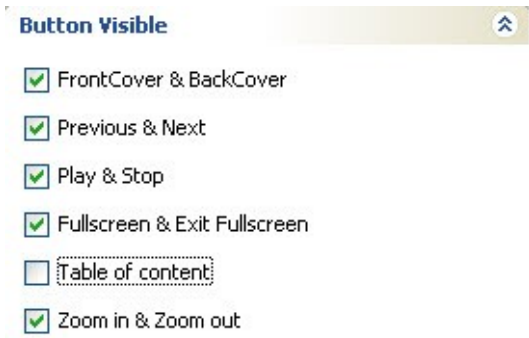

Set Preloader

When e-book is loading, a preloader will be showing on screen. Here you could directly select different types of preloader on the drop-down menu. By clicking the glass icon, you could view specify preloader effect and select the one you like.

4. Button Settings.

In this section, you could decide what button(s) should be displayed on navigation bar of published flipbook, by ticking box accordingly. To hidden button(s), just do not tick the box before options.

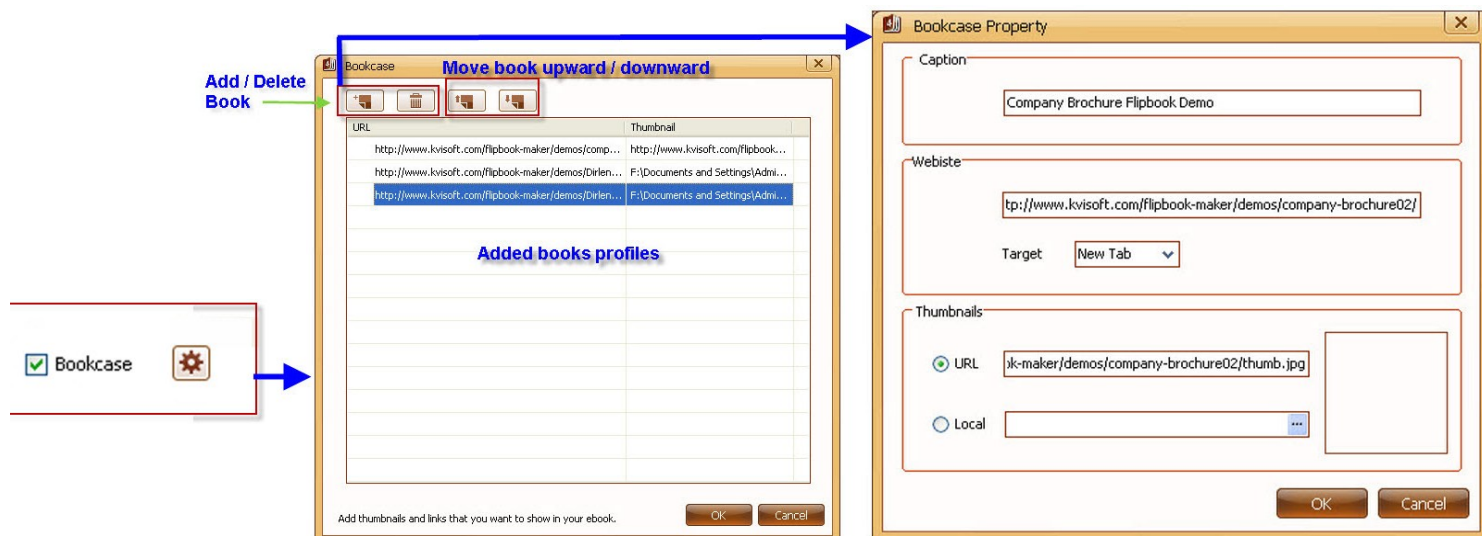

Set Bookcase

Readers can select and open another publication in bookcase.

To add books to bookshelf, publishers should follow these steps:

- a. Click Edit button, the bookcase edition window will pop up.
- b. The Bookcase window lists books profiles. You could add, delete, move up, and move down selected books.
- c. Hit the Add button, and then set bookcase property by inputting caption, book URL, thumbnail source path. 2 options are available for the way of opening book URL after clicking the book thumbnail on the shelf, new tab or current tab.

Set Language of Navigation

Languages panel is for setting the **language of navigation buttons** on output flipping publications.

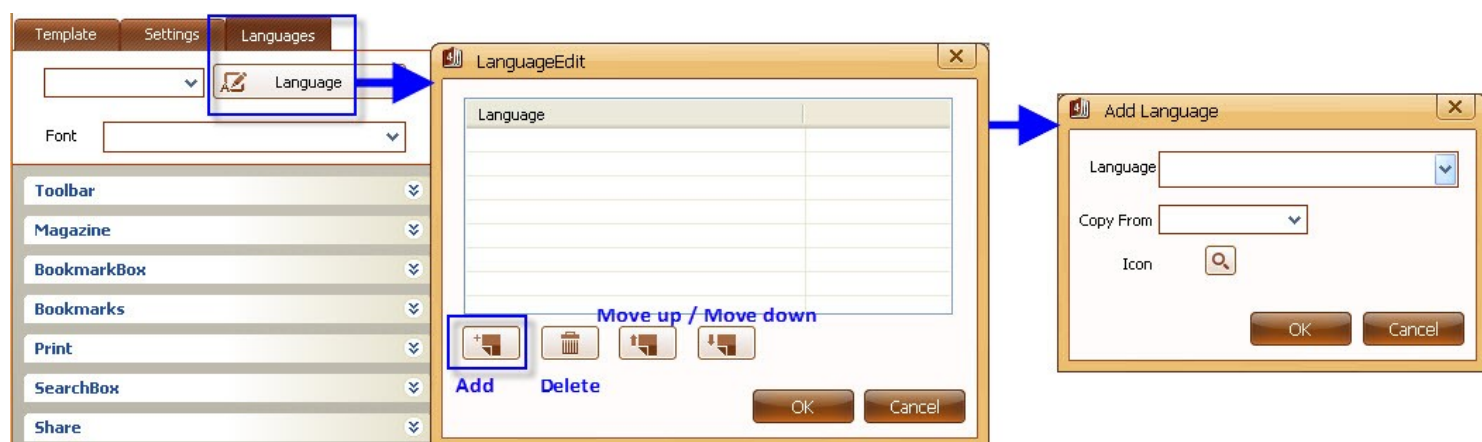

Apply Pre-set Language

Default language is English. If you want to change, there are some built-in translated languages for you to choose.

Custom language of navigation buttons

If the pre-set language you want is not included in the list, you can translate to it with language editor. Steps:

1. Click language button, language Edit window pop up.
2. Hit the Add button.
3. Please click drop-down menu to choose the language you want to add > You can copy from old language > Click the glass button to choose our built-in icon or use your own file from your computer as language icon > Click OK

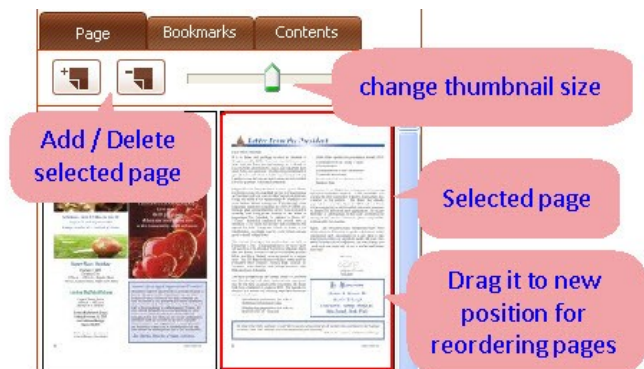

after finish setting.

4. Tick language on the LanguageEdit window to apply the added new navigation language.

Page Arrangement

In the Page panel, it shows page thumbnails. Clicking on a thumbnail, its frame becomes red which means it is selected. Then you could:

- ✓ Preview page(s). Once click the thumbnail, middle viewing area will display the whole page you selected.
- ✓ Change thumbnails size. Thumbnails can be enlarged or shrink by the bar next to Delete button.
- ✓ Add / Delete page(s). Use the Add button to add new page(s) or click Delete button to delete selected page.

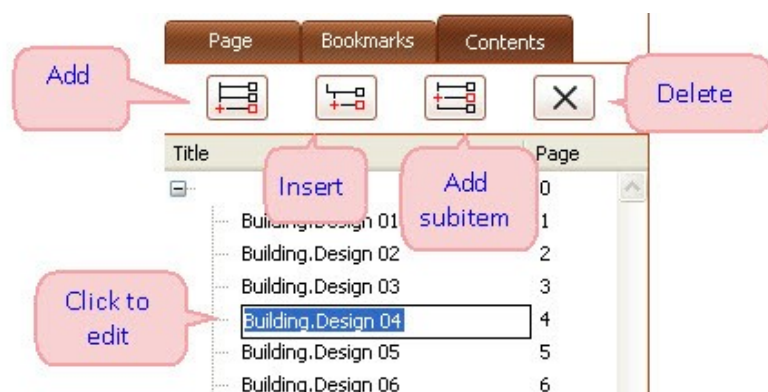

Set Bookmarks

You can add / edit / delete bookmark here, and select different color for bookmarks.

Table of Contents

Program will load table of contents information automatically if your original PDF file has one. If not, you also can create table of contents in Contents panel with buttons as pictures shows. To edit content in this table, just simply click over the title or page column, then type title content and page number accordingly.

3. Add Media Elements

In the Page Editor tab, you can add rich interactive multi-media elements, including text, image, video media, and shape. Following are instruction of adding and editing various elements.

Text

Here, text includes plain text/ dynamic text/ bubbles callouts. Steps to add text:

1. Select specific page > Click Plain TXT / Dynamic TXT / Callouts button > Left-click, hold & drag mouse to draw a frame on page.
2. Type text content on pop-up window.

3. Set element's properties, position, size, layer order, font, paragraph, respond action after mouse click, effect of text entrance and leave, and style.

4. Mouse-click over added element or click element title on Outline panel, to continue editing text.

Image

This function allows you to add online or offline image, image gallery / slideshow, screenshot and Flickr pictures to flipbook.

1. Online or offline image.

Select specific page > Click Plain TXT / Dynamic TXT / Callouts button > Left-click, hold & drag mouse to draw a frame on page > Load local image form PC or enter URL of online image.

Then use the image toolbar to set image properties, layer, mouse click action, and picture style.

2. Image gallery / slideshow.

Select specific page > Click Galley button > Left-click, hold & drag mouse to draw a frame on page > Load local images form PC. After, you could set gallery name, position, size, layer order, and gallery style.

3. Screenshot.

Select specific page > Click Screenshot button > Left-click, hold & drag mouse to draw a frame on page > Then follow tips displayed on the current screen:

- ✧ Left click, hold & drag mouse to draw frame of capture.
- ✧ Press ESC key or right click to exit.

After you draw a frame, tips are like these:

- ✧ Left click to resize capturing area and position.
- ✧ Double click within capturing frame to save image and end this operation.
- ✧ Right click to reselect.

When screenshot is captured and added to page, you could use toolbar to do more setting about properties, layer, action, effect, and style, same as above toolbar.

4. Flickr Image.

Select specific page > Click Flickr button) > Left-click, hold & drag mouse to draw a frame on page > Add Flickr window will pop up.

Then input Flickr ID or URL to add image from Flickr. To do image editing, just as above instruction on Point.1.

Video

Including offline/online video, YouTube/ Vimeo.

1. Add offline/online video:

Select specific page > Click Video button > Left-click, hold & drag mouse to draw a frame on page > Add Video window will pop up, then select offline video from PC or online video with UR.

After, you could use toolbar to do more editing and settings about properties, layer, play controls, and skin style.

2. YouTube / Vimeo.

Select specific page > Click YouTube or Vimeo button > Left-click, hold & drag mouse to draw a frame on page > Add YouTube/Vimeo window will pop up, then input YouTube/Vimeo ID or URL.

After, you could further edit video as above Point.1.

Music

To add music to single page, please follow these steps:

Select specific page > Click Music button > Left-click, hold & drag mouse to draw a frame on page > Add Music window will pop up, then select offline music from PC or input URL of online music.

After, you could use toolbar to do more editing and settings about properties, layer, play controls and skin.

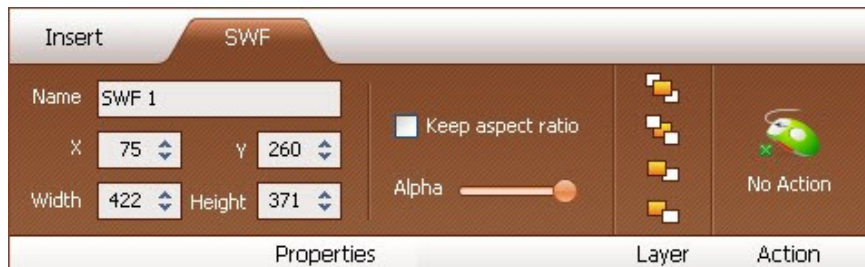

SWF

Flash SWF files are also supported, follow these steps to add them to page:

Select specific page > Click SWF button > Left-click, hold & drag mouse to draw a frame on page > Add SWF window will pop up, then Import from PC.

After, you could use toolbar to do more editing and settings about properties, layer and action.

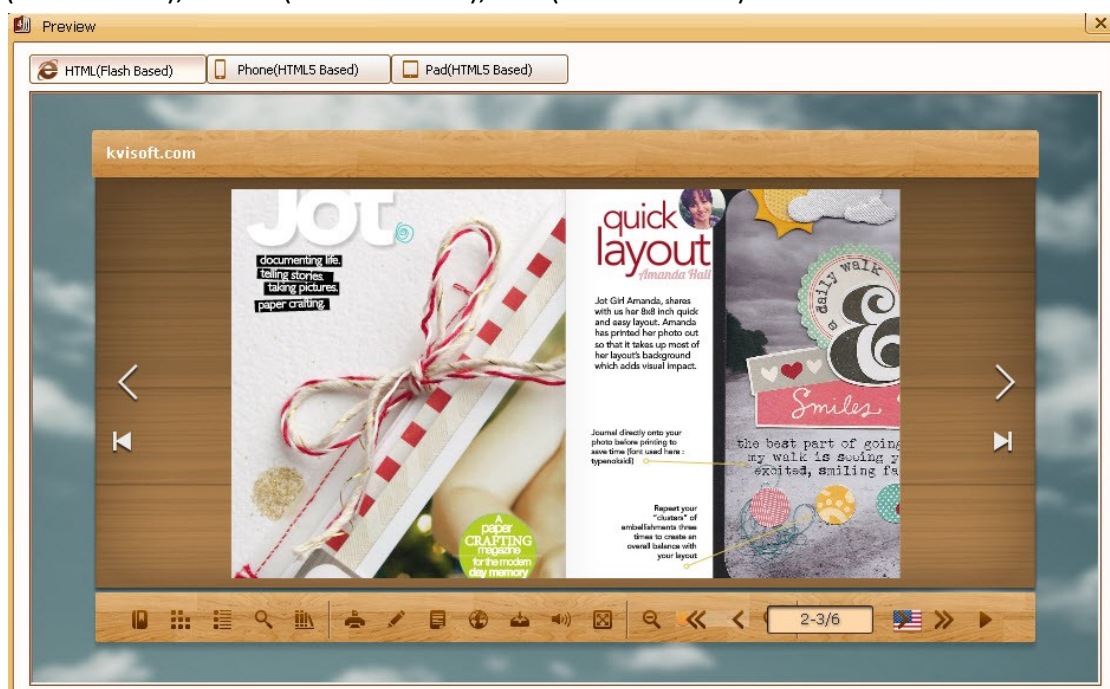

Shape

There are plenty of built-in shapes, like line, rectangle, flowchart, banner and so on. Steps to add shape: Select specific page > Click Shape button > Left-click, hold & drag mouse to draw a frame on page. After, you could use toolbar to do more editing and settings about properties, layer, and type.

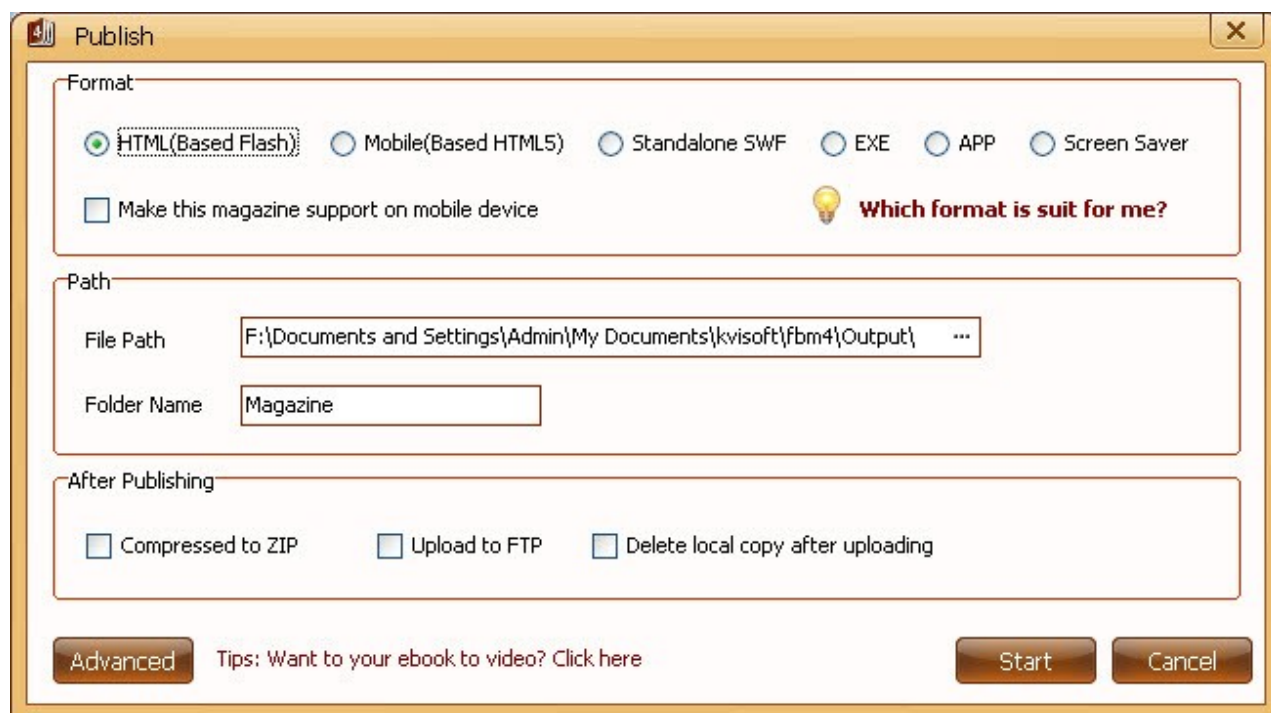

4. Preview Final Edition

Click the Preview button on Design tab, to view final edition of your flipbook. It contains 3 preview results: HTML (Flash Based), Phone (HTML5 Based), Pad (HTML5 Based).

5. Publish Publications

After editing work is done, you could click Publish button on Design tab to set publishing options.

Publish Options

Format setting. You could publish flipbook as HTML flash, HTML5 mobile, standalone SWF, EXE, APP, screen saver.

✓ **Flash based HTML format.**

This format is suitable for sharing e-book online, such as website page, blog, Facebook page, etc. Output includes folders and files. Adobe Flash Player 9.0 is required for readers.

✓ **HTML5 based mobile version.**

This program can output HTML5 flipbook which can be viewed on mobile devices, such as iPad/iPhone/iPod, Android Smartphone, Windows Phone, Windows 8 tablets, and so on.

✓ **Standalone SWF.**

Output only has one single SWF file which is suitable for both online or offline distribution.

✓ **EXE.**

Standalone executive document for Windows. It fits offline delivery, such as CD, DVD, USB drive, hard drive, etc.

✓ **APP.**

Standalone executive document for Mac. This format is for reading on Mac computers without internet.

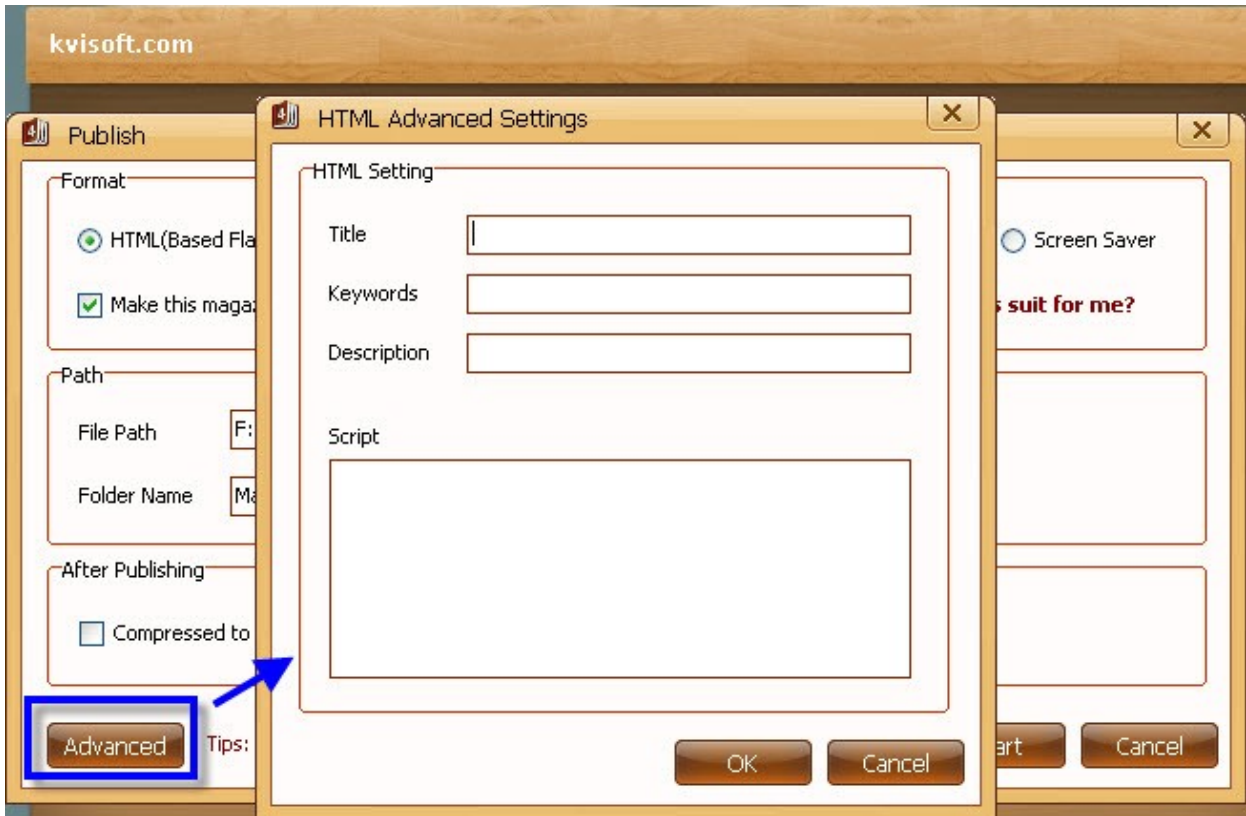

✓ **Screen Saver.**

This software allows you to create a screensaver file (*.scr) so that you can use a flipbook as your computer screensaver.

Path setting. Here you could define output file store path, and name of book/ output folder.

After Publishing setting. For setting actions after published, just pick what you like. Available options including compressed to ZIP, upload to FTP, delete local copy after uploading.

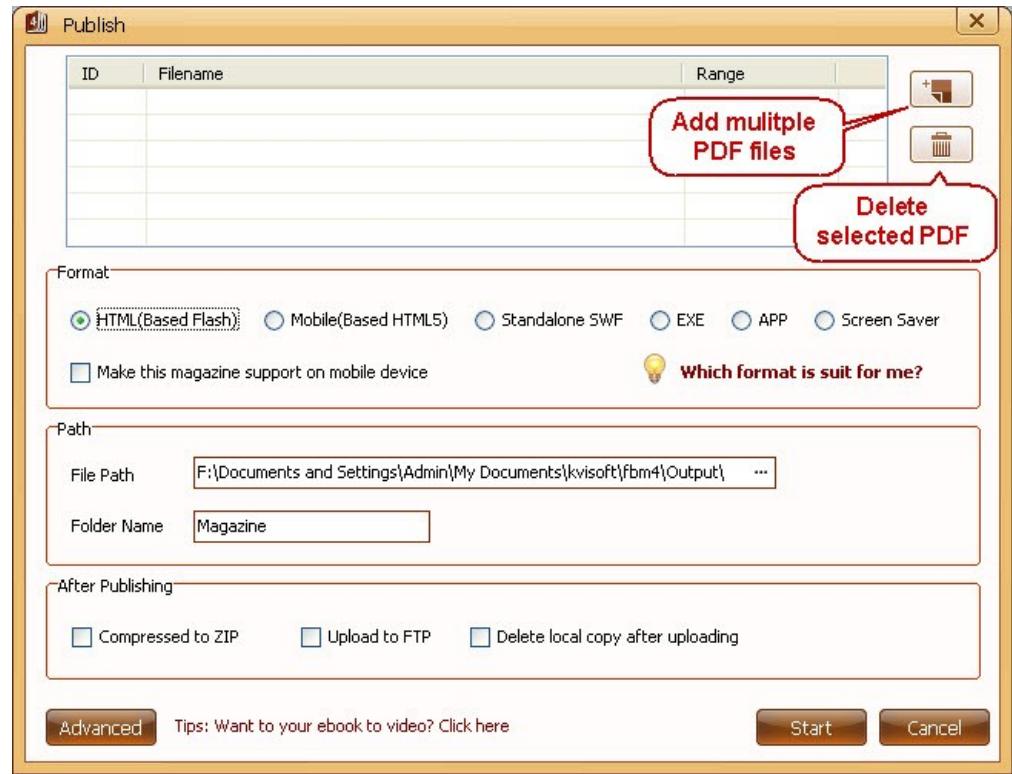

Advanced setting for HTML. By inputting title, keywords, description and script, it will make your HTML file more SEO friendly for search engines to crawl and get that information.

Batch Publish

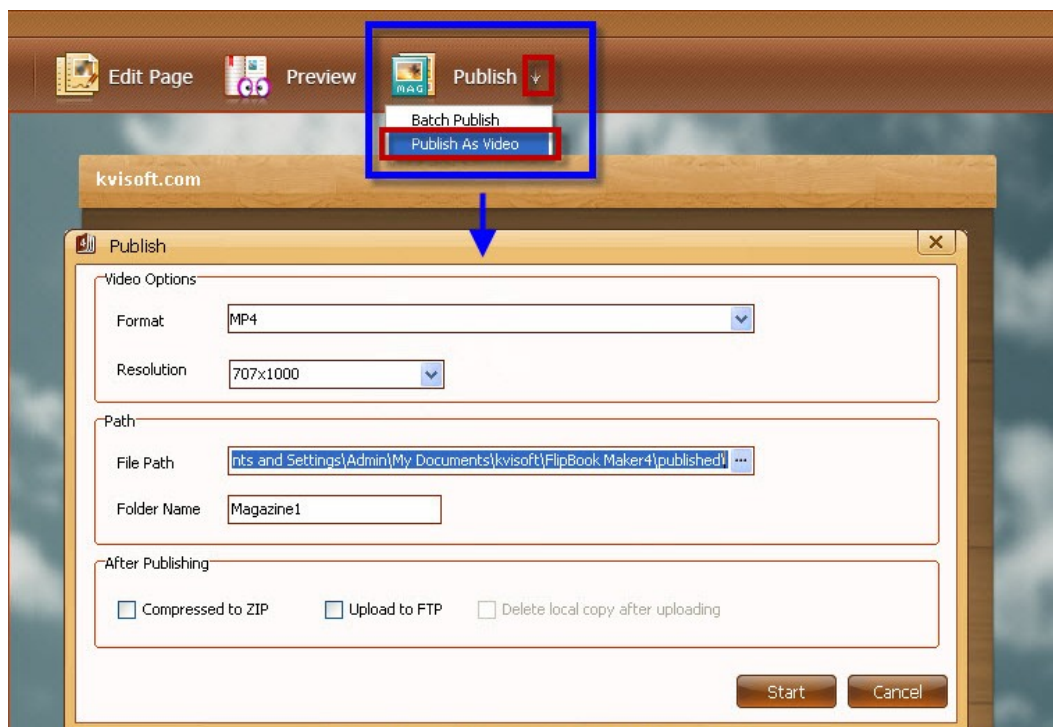

There is an arrow on right of Publish button on Design window, click it to select 'Batch Publish'. Then use Add button to import multiple PDF files. To delete selected PDF, just hit the Delete icon. After finish other publish options and settings, press 'Start' button to do batch conversion.

Publish as Video

There is an arrow on right of Publish button on Design window, click it to select 'Publish as Video'. After, you can set video format, resolution, file path, folder name, after publishing action, advanced setting. Finally, click 'Start' to convert flipbook to video.

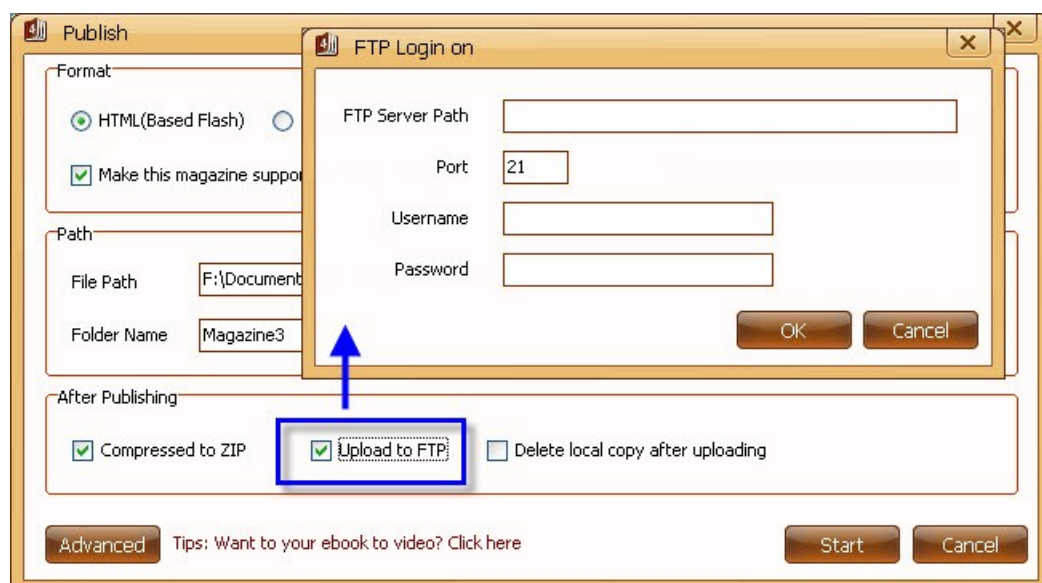

6. Share, deliver, and distribute created flipbook.

Now you are satisfied with your flip book and want to publish to share with others. There are many ways:

Upload and host to online website:

1. Select HTML or SWF format option to publish your flipbook.
2. Upload to FTP. You could manually FTP the whole output folder to your website server. Or use the built-in option Upload to FTP. Then you could get URL for index.html or swf file. That is the URL of your online flipbook.

3. If you want to embed flipbook into an exist page, get code from <http://www.kvisoft.com/tutorials/publish-flipbook-online-when-you-have-no-site.html>

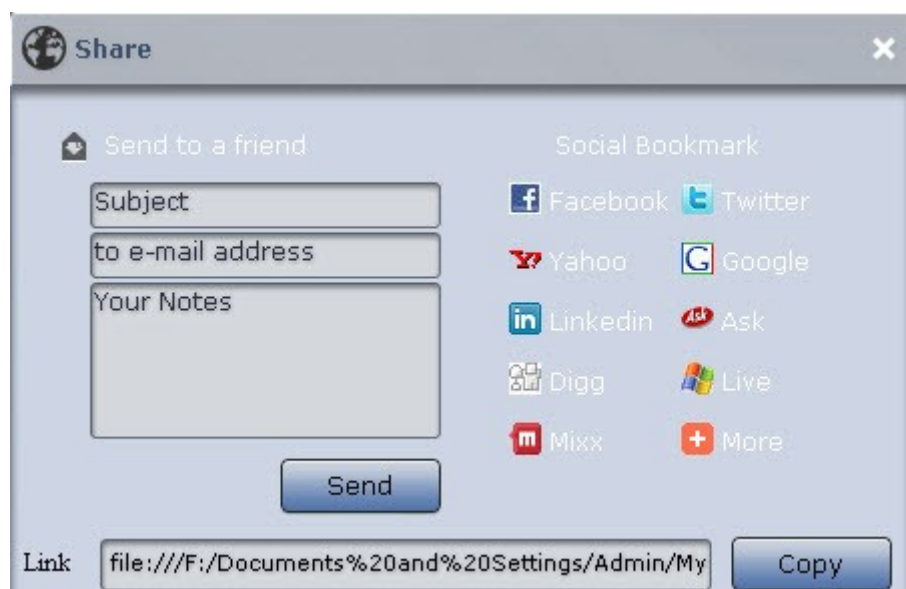

View on mobile devices:

To make digital publications which can be viewed on mobile devices like iPhone, iPad, iPod and Android-powered devices, you just need to check mobile option when publishing, and then upload your publications to website, so people can visit that online flipbook on mobile devices with internet.

Social networks sharing:

When viewers reading flipbook online, they can click the Share button on navigation bar, to share the flipping book to Facebook, Twitter, LinkedIn, Digg and more social sites or E-mail or copy it to others.

Send eBook via email:

1. When in Publish window, check the option of Compressed to ZIP in After publishing settings.
2. Enclose zipped package in output folder to your email.
3. Send.

Share it as ScreenSaver:

Flip Book Maker Pro allows you to create a screensaver file (*.scr) so that you can set a flip book as your desktop screensaver. In this way, you can also easily share your engaging flip book with anyone who can see your PC.

Distribute via offline CD:

You may burn output flipbooks to CD, or other storage devices, then distribute them offline. In this case, it is better to publish flipbook as EXE or SWF format.

Part3: FAQ

- **What is the requirement to run the software?**

It will run on any PC with Windows 7 / XP/ Vista 32-bit and 64-bit operating system. The minimum system requirements: 1 GHz CPU, 512 MB RAM and Adobe Flash Player 9. Recommended: 2 GHz CPU, 1 GB RAM and Adobe Flash Player 10

- **May I use Flip Book Maker for commercial purposes?**

Yes, you may sell your publications created by Flip Book Maker if you've already purchased the Commercial License.

- **What is difference between Kvisoft Flipbook Maker Pro regular and pro version?**

Please refer to this page: <http://www.kvisoft.com/flipbook-maker/vs-pro/#tabs>.

- **Can I buy one license and use it on multiple computers?**

No, 1 license for 1 computer only. If you want to apply multi user, please purchase multi licenses.

- **How do I find out which version of Flip Book Maker I am using?**

You will find the version numbers at **About** page under **Help** menu in the upper right corner of the program.

- **Why does Flip Book Maker prompt me to install Adobe Flash Player?**

Adobe Flash Player 9.0 or above is required. Without it, it may cause the failure of flip book creation.

- **How to publish HTML5 Flipbook?**

In Publish window, select format options of Mobile(Based HTML5).

- **How to batch publishing?**
